

Sunnyslope County Water District Improvement Standards

9010 Improvement Standards

9010.1 In order to provide a uniform and consistent method of regulating and guiding the design and preparation of plans for construction of water and sewer services, facilities, and to insure proper installation of all private works involving water and sewer services, Improvement Standards, including Standard Details, shall be maintained by the District.

9010.2 The purpose of Improvement Standards is to provide standards to be applied to water and sewer service improvements and to private works that will be dedicated to the public and accepted by the District for operation and maintenance. This is necessary to provide coordinated development of public facilities.

9010.3 Any items or situations not included in the Improvement Standards shall be designed and/or constructed in accordance with accepted engineering practice, the State of California "Standard Specifications" and "Highway Design Manual", the City of Hollister Standards, and as required by the General Manager.

9010.4 Proposed changes in the Improvement Standards shall be presented to the Board of Directors for their review and consideration. If the proposed change(s) is approved by the Board, staff shall incorporate said change(s) in the originals of said Standards, and shall annotate the date of said revision approval upon the documents.

9010.5 The current Improvement Standards shall be available at the District office for review. Copies shall be available to interested parties upon request, with payment of the reproduction cost.
